

crocstm_{Rx}

You love the comfort and ease of Crocs but what makes the CrocsRx models different?

All Crocs are produced from croslitetm material. Due to this materials' closed cell properties, Crocs are anti-microbial and impact absorbing, relieving pressure from hips, knees and back. The CrocsRx division wanted to take this wonderful product a step further so we adapted Crocs footwear to address compromised foot conditions.

The CrocsRx models (Relief, Cloud and Silver Cloud) were created by a group of leading consultants to provide comfort to individuals with general foot issues and diabetic foot ailments. The American Podiatric Medical Association, which has a long history supporting preventative medication and healthy foot products, proudly granted the CrocsRx line with their Seal of Acceptance. The American Podiatric Medical Association's main goal was to raise awareness by identifying products with exceptional quality, that are manufactured with the consumers comfort and safety in mind.
